

# 1st Canada-wide Account of Hub/Situation Table Adopter Sites and Situations Triaged for Acutely Elevated Risk (Since 2011)

As of November 28, 2016

© 2016 Global Network for Community Safety Canada Inc. Distribution permitted without modification, and proper citation requested.

Please note that the purpose of this study was to provide an accurate-as-possible snapshot of the current level of adoption of risk-driven intervention models, and to capture the total number of situations that have been brought forward to such tables since the first Hub table was launched in Prince Albert, Saskatchewan in February, 2011. Not all numbers may be accurate to a common date, and all are subject to change on a weekly basis. As additional sites report their experience, this information may be updated in a future report. Our Global Network team extends its appreciation to the many practitioners who assisted us in completing this study. This infographic will remain available for download from our website (see below).

## Saskatchewan

### Confirmed Sites and Triage

Global Network confirms that there are **14 communities served by active Tables** in Saskatchewan which have triaged **3768 situations** to date.

Prince Albert North Battleford Yorkton La Ronge Melfort Nipawin  
Saskatoon Moose Jaw Swift Current/Southwest Lloydminster Meadow Lake  
Wayburn - Estevan (Shared Table) Muskoday FN (Modified Model)

## Ontario

### Unconfirmed Triage

Global Network confirms that of the 40 active Tables, there are **10 active Tables** in Ontario for which we have not yet been able to confirm the number of situations triaged to date.

It is estimated that there were **200 situations** unconfirmed in Ontario.

*We welcome representatives of these communities to contact us with updated information that we can share in a future edition of this study.*
